

ROBIN MILLARD-MARTIN

Awarded the 2016 Bulkley Valley Research Centre's Irving Fox Memorial Scholarship for Natural Resources Research and Management

The BVRC was pleased to present the 2016 Irving Fox Memorial Scholarship for Natural Resources Research and Management to **Robin Millard-Martin**, who recently graduated with honours from the Associate of Science Program at Northwest Community College in Terrace. Robin will continue her studies in September 2016 through the Bachelor of Environmental Science Degree Completion Program at Royal Roads University.

Robin moved to Smithers in 2011 and worked as a tree planter and quality supervisor during the summer months. She later trained as a forest technician and worked in the greater Bulkley Valley area for a number of years as a local forestry consultant. This work provided her with the experience necessary to understand forestry operations and management in British Columbia and provided her with the impetus to continue her education.

After completing her degree, Robin plans to return to Terrace where she can utilize her skills and knowledge to promote environmentally sustainable resource management in Northwestern British Columbia. She would like to further her knowledge of West Coast fisheries and aquatic/marine sciences by working with experienced experts and taking part in scientific research. As an avid adventurer and outdoor enthusiast, Robin is committed to environmental stewardship and utilizing best management practices in any development and resource-based industries.
