

***Update on the 2009 recipient of the  
Bulkley Valley Research Centre - Irving Fox Memorial Scholarship for  
Natural Resources Research and Management***

**Nicole Glover**, the 2009 recipient of the Bulkley Valley Research Centre's Irving Fox Memorial Scholarship for Natural Resources Research Management, is finishing school this summer (2012) and hoping to find resource management work in the North.

Nicole is currently in her last month of classroom studies at the British Columbia Institute of Technology (BCIT) in Vancouver. After completing online courses and a final project over the next six months to a year, she will graduate with an environmental engineering bachelor's of technology.

Nicole is currently looking for an industry sponsor, as she needs two years' work experience to complete her degree.

"I'm looking for something in the environmental field. I'm interested in doing research and environmental impact stuff," she said. "I'm hoping to move there this summer and find work."

Originally from Terrace, Nicole left the North in 2007 and travelled for a year before taking Environmental Technology at Camosun College in Victoria. She completed her diploma last June. Her work history includes spending summer 2010 working for Parks Canada as an ecosystem restoration technician at Fort Rodd Hill National Park on Vancouver Island. She also volunteers with VanDusen Botanical Garden in Vancouver as an assistant leading children's field trips.
